HYDROCLEAN

*A Superior Hydrogen Peroxide Cleaner
& Organic Stain Remover*

This product meets "Dfe" (designed for the environment) manufacturing standards as set by the U.S. EPA and is considered a green product.

Hydroclean uses the power of stabilized hydrogen peroxide to penetrate, lift and remove the staining, soiling and odors of fungus (mold/mildew), algae and other organic debris (i.e. dirt, fuels, oils, blood, etc). You'll know it's working when you see Hydroclean's significant visible foaming action. Additionally, natural "G.R.A.S." (Generally Recognized As Safe) ingredients ensure consistent source removal and clearance testing when used in remediation protocols. Because of its low-toxicity and VOC compliance, Hydroclean is safe in and around living and work environments for you and your customer's peace of mind.

USE INSTRUCTION*

READY TO USE. Do not dilute. For Surface Preparation, apply Hydroclean liberally onto surfaces and allow to dry. For Remediation protocols, apply Hydroclean and scrub to loosen soils. Remove suspended soils via HEPA vacuum, wipe method or rinsing. For deep staining, apply liberally and allow to dry without rinsing. Repeat if necessary. Allow surface to dry before applying Microbloc Protex products.

NET CONTENTS: 5 GALLONS
